Fastrack Elevators Providing Quality Elevator and Escalator Maintenance Services for Any Brands, Any model.

Schindler

Elevator Maintenance

Fastrack offers preventive maintenance programs for passenger elevators, freight elevators, material lifts, accessibility lifts and all types of code-compliant elevating devices from ANY COMPANY—not just our own products.

We provide three types of elevator maintenance contracts to keep your device running smoothly:

- ✓ Labour, Oil, & Grease (LOG)
- ✓ Full Maintenance (FM)
- ✓ Full Maintenance Extended (FMX)

No matter what preventive maintenance program you choose, you will receive exceptional service from our qualified route mechanics backed by our senior mechanics who provide trouble-shooting on difficult elevator issues.

Labour, Oil, & Grease (LOG)

Labour, Oil, & Grease (LOG) contracts provide the minimum service required to comply with IS requirements, including routine maintenance during scheduled visits (cleaning, lubricating, minor adjustments, and visual inspections) and safety tests. Repairs are not included

Full Maintenance

Full Maintenance (FM) contracts provide the benefits of the LOG contract plus a full preventive maintenance program, as well as replacement of components in elevator shaft.

Full Maintenance Extended (FMX)

Full Maintenance Extended (FMX) contracts provide the benefits of the LOG contract plus a full preventive maintenance program, as well as replacement on most major elevator components. Includes all Repairs.
